and short CSP update.**

"THE ORGANIC OPPORTUNITY" explores Woodbury County, Iowa's story of hope and practical solutions for rural communities. It is not just about organic food—it is a story that demonstrates how local communities can create a different food system which provides its citizens with wonderful food, makes it possible for young farmers to remain in the community and farm, while simultaneously improving the local economy. And Woodbury County did it without any federal program funding. An inspiring film by Chris Bedford.

"King Corn" is a "gentle, meandering film in the Truth-Seeking Comic Hero genre, as practiced by Michael Moore and Morgan Spurlock," according to Matt Seitz of the New York Times. Follow the story of Mr. Cheney and Mr. Ellis as they move to rural Iowa to grow corn on their great-grandfather's farm. This film offers insights and sparks conversation.

A film by Aaron Woolf, Curt Ellis and Ian Cheney
